introduction

This annual cumulative index to **sociological abstracts (sa)**, 1999, Volume 47, includes author, source, and subject indexes. All references to documents abstracted or cited in **sa** are by the accession number that precedes each abstract, dissertation citation, or book review. Accession numbers are structured as follows:

(1) five-digit accession number preceded by 99 or SA (eg, 9902851 or SA08020) refers to abstracts of journal articles, abstracts of book or book chapters, or dissertation citations;

(2) five-digit accession number preceded by 99S (eg, 99S37920) refers to abstracts of conference papers; and

(3) six-digit accession number preceded by 99a or a (eg. 99a142401 or a145267) refers to book review citations.

The *cumulative author index* is a name and not a person index. Author names are as they appeared in the source publications referenced.

The *cumulative source index* includes the full title, subtitle(s), and current subscription address of each publication screened for articles that satisfy **sa** selection criteria. References to articles abstracted from each publication, if any, are by year, volume, issue, sequence number, month/season, and pagination. Also listed are the association meetings at which papers abstracted in 1999, Volume 47, were presented. Titles of books and book chapters abstracted are presented by **sa** issue in which they appeared.

The *cumulative subject index* contains subject entries for documents cited in **sa**. Documents are indexed using the *Thesaurus of Sociological Indexing Terms*, comprising over 4,000 descriptor terms. These terms appear in boldface type in the subject index. Relevant abstracts are listed by accession number; additional descriptors assigned to that abstract are also identified.
